Executive Summary

This guide provides only a short summary and analysis of the many provisions in the bill. To obtain a complete understanding of any particular provision, users are encouraged to review the actual legislative language. The bill and accompanying report are available on the NGB-LL web page at

<http://www.nationalguard.mil/Leadership/JointStaff/PersonalStaff/LegislativeLiaison.aspx>

House:

On April 14th, the House appropriations subcommittee on military construction and veterans affairs released its fiscal 2016 Military Construction and Veterans Affairs appropriations measure (HR 1735) that totals \$76.6 billion. That's \$4.6 billion above the 2015 enacted spending level yet \$1.2 billion less than President Barack Obama sought.

Military construction and family housing funding would total \$7.7 billion, or \$904 million above the fiscal 2015 enacted level but \$755 million below the request.

The bill includes \$512 million for construction or alteration of Guard and Reserve facilities in 28 states, an increase of \$85 million above the fiscal year 2015 enacted level. However, the measure does not support two ARNG administration requested projects in Delaware and Washington.

The House passed the measure on Thursday, April 30th with a vote of 255-163.

Senate:

The Senate Appropriations Committee on May 21st passed its fiscal 2016 Military Construction and Veterans Affairs appropriations measure.

The measure passed the Senate at a vote of 93-0 on November 10th, 2015.

Below you will find a detailed analysis of the Army and Air National Guard accounts.

Army National Guard

(All Dollars in Thousands)

Army National Guard	FY16 President's Budget Request	HAC-MILCON Mark	Delta from FY16 Request	SAC Mark	Delta From FY15 Request	Final Bill	Delta From FY16 Request

House Provisions of Interest

Military Construction, Army National Guard

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Army National Guard, and contributions therefor, as authorized by chapter 1803 of title 10, 12 United States Code, and Military Construction Authorization Acts, \$167,437,000, to remain available until September 30, 2020:

Provided, That of the amount appropriated, not to exceed \$20,337,000 shall be available for study, planning, design, and architect and engineer services, as authorized by law, unless the Director of the Army National Guard determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of the determination and the reasons therefor.

Military Construction, Air National Guard

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Air National Guard, and contributions therefor, as authorized by chapter 1803 of title 10, United States Code, and Military Construction Authorization Acts, \$138,738,000, to remain available until September 30, 2020:

Provided, That of the amount appropriated, not to exceed \$5,104,000 shall be available for study, planning, design, and architect and engineer services, as authorized by law, unless the Director of the Air National Guard determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of the determination and the reasons therefor.

House Report

Department of Defense (DOD) excess facilities capacity

DOD is facing long term challenges in maintaining its extensive portfolio of facilities and reducing unneeded infrastructure. The Office of the Secretary of Defense (OSD) has made some improvements, but the military departments' use of their databases to identify consolidation opportunities is still in need of improvement. During the fiscal year 2016 Hearing on Installations, Environment, and BRAC Senior DOD officials testified that DOD continues to have excess infrastructure and that an additional BRAC round is necessary to make further reductions and achieve future cost savings. With BRAC authorization not under the jurisdiction of this Committee, the Committee therefore, directs each Services Assistant Secretary for Installations, Energy and Environment to provide a strategic plan to manage DOD's excess real property efficiently and what opportunities there are to consolidate unutilized or underutilized facilities subsequently reducing operation and maintenance costs for maintaining those facilities. This report shall be submitted no later than 90 days after enactment of this Act.

Enforcement of Border Security—Recognizing the need to bolster resources for the enforcement of border security, the Committee instructs the Army National Guard and the Air National Guard to explore public-private partnerships with state and local governments, to design, and construct facilities adjacent to our southwestern border that will support National Guard activities and house and support assets used by Customs and Border Protection and other law enforcement agencies for the terrestrial, maritime, and aerial surveillance of those borders, to include aircraft hangars suitable for unmanned aerial systems and report back to the Committee 180 days after the enactment of the this Act.

Senate Report

Defense Access Roads and Entry Control Points.-The Committee remains concerned about the impact of military construction funding constraints on the prioritization of essential Defense Access Roads and Entry Control Points at a number of U.S. military installations. Of particular concern are growth installations that serve primarily as host commands for a wide array of military services and agencies, and bases that have experienced significant population growth as a result of base realignment activities.

Adding to the urgency of this problem, the U.S. Northern Command on May 8, 2015, raised the force protection level for all military installations in the continental United States to the second highest alert level, Bravo, which applies when an increased or more predictable threat of terrorist activity exists. According to the Defense Department, the security order affects 3,200 sites, including bases, National Guard facilities, recruiting stations and health clinics. As a result of this action, there will be more comprehensive checking of those entering military installations, which could have

National Guard Military Construction.-Declining military construction investments resulting from current budget constraints are negatively impacting all branches of the Department of Defense. However, for the National Guard, securing military construction funding is further inhibited by the need for the respective States to acquire land for a project before the project can be programmed for funding. While this is rooted in past

instances in which project execution was jeopardized because of issues in acquiring a site, the result is that a State has to acquire and hold land before the Guard can request military construction funding for a project. This requirement often results in a disconnect in the availability of State and Federal funding for a National Guard project, making it more difficult for the Guard to prioritize future project funding. Therefore, within 120 days following enactment of this act, the Director of the National Guard Bureau is directed to report to the Committees on Appropriations of both Houses of Congress on ways in which the process for National Guard military construction funding can be streamlined and more efficiently coordinated with the availability of land for a project so that Guard projects remain competitive in the Future Years Defense Program.
